

1/4

Lysozyme Released from GF/PVP + 11.2% Particle Suspension

1:2:1 lysozyme:sucrose:methione+

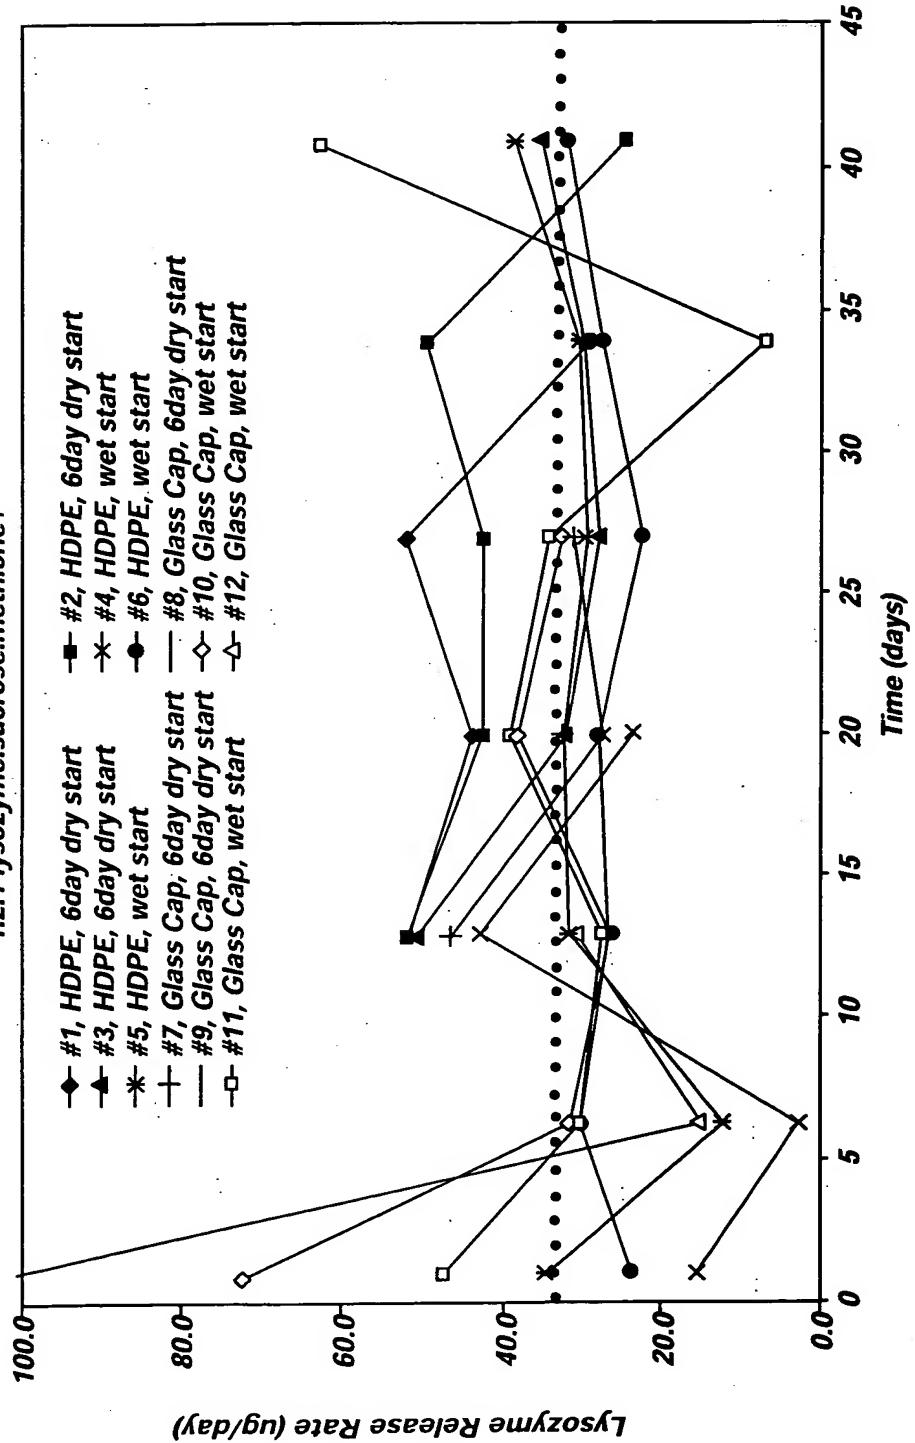

FIG. 1

2/4

Formulation A Stability by RP-HPLC

*Oxidation increased approximately 0.25% after 3 months at 40° C.
Deamidation increased less than 0.5% after 3 months at 40° C.*

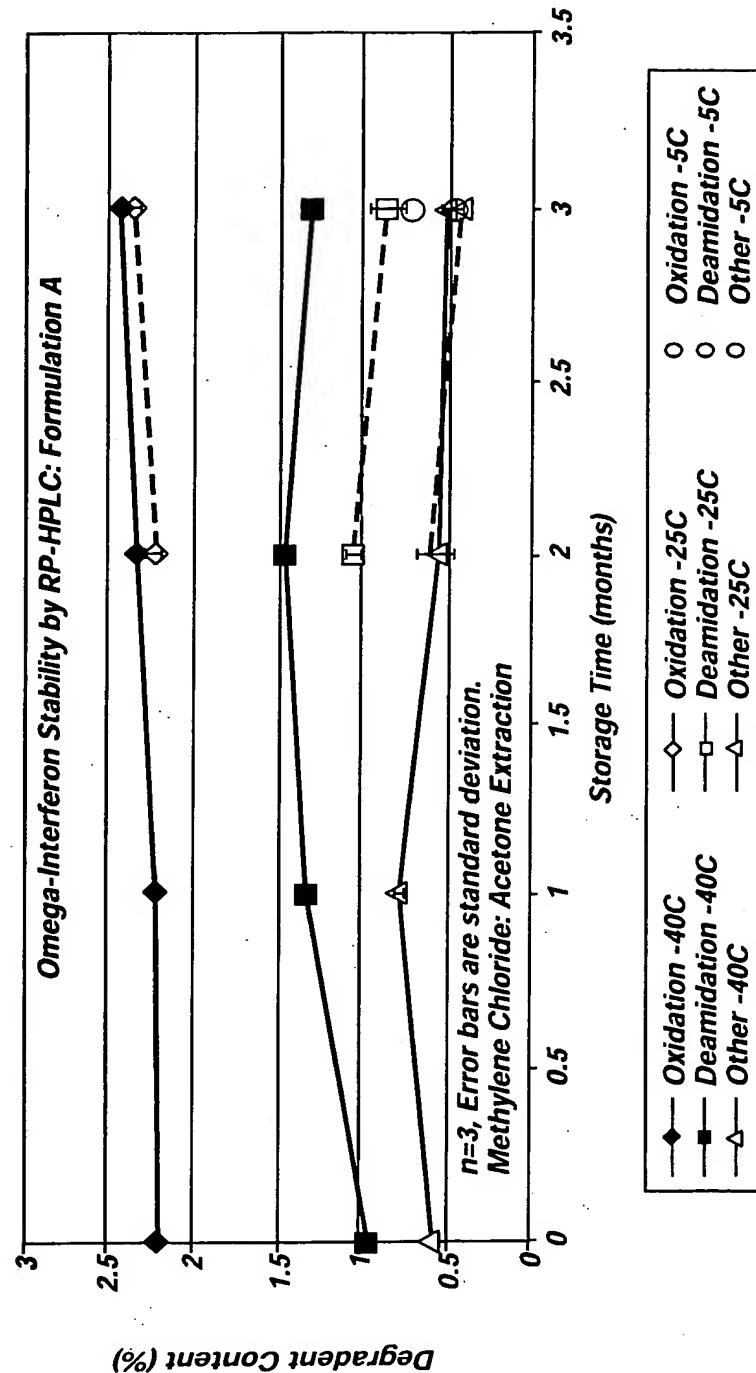

FIG. 2

3/4

Formulation B Stability by RP-HPLC

*Oxidation increased approximately 0.25% after 3 months at 40°C.
Deamidation increased less than 1.3% after 3 months at 40°C.*

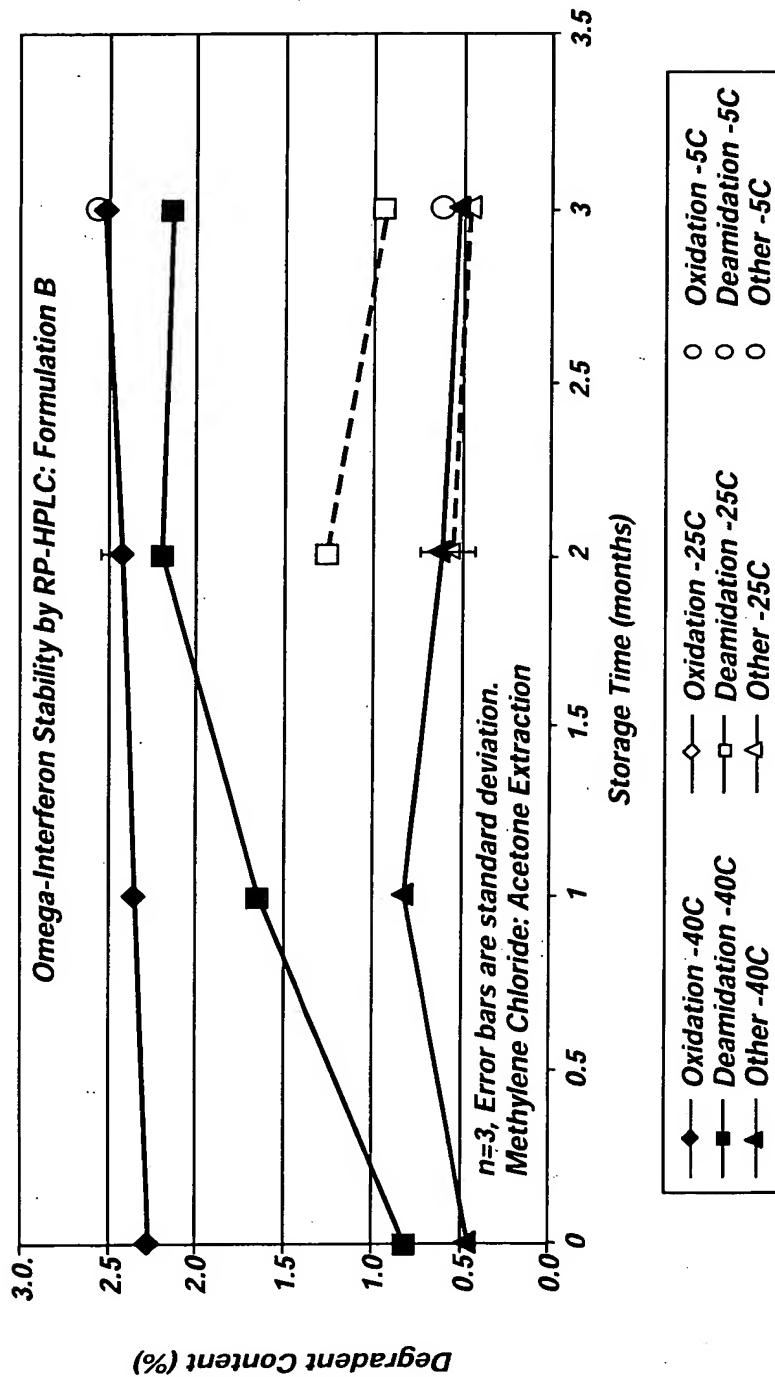

FIG. 3

4/4

Omega-IFN Monomer Stability by SEC
After 3 months stability, no significant amounts of aggregation detected.

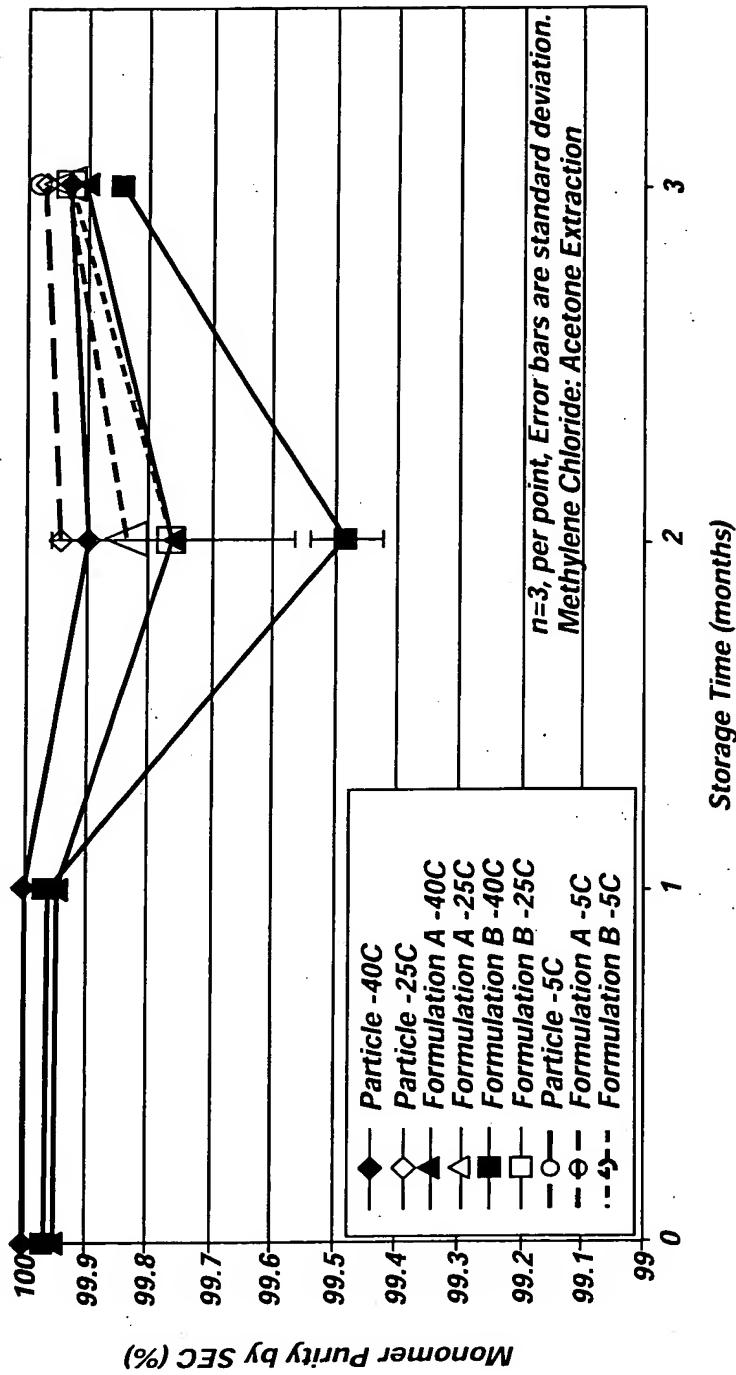

FIG. 4
